

AHMET YILMAZ

FRONTEND DEVELOPER

Istanbul, Turkey | ahmet.yilmaz.test@example.com | github.com/ahmetyilmaz-test

PROFILE SUMMARY

Frontend developer with 3+ years of experience building responsive, accessible, and performant web applications using React and modern JavaScript tooling. Passionate about component-driven architecture, design systems, and delivering smooth user experiences.

PROFESSIONAL EXPERIENCE

Frontend Developer - Pixelworks Digital Agency (2023 - Present)

- Built and maintained component libraries in React and TypeScript, used across 6+ client products.
- Migrated a legacy jQuery codebase to a modern React + Vite stack, cutting page load time by 40%.
- Implemented responsive layouts with Tailwind CSS and CSS Grid for cross-device consistency.
- Collaborated closely with UX designers in Figma to translate mockups into pixel-perfect interfaces.

Junior Web Developer - Loomify Startup (2022 - 2023)

- Developed landing pages and marketing sites using HTML, CSS, and vanilla JavaScript.
- Integrated REST APIs for a customer dashboard built with Vue.js.
- Wrote unit tests with Jest and improved test coverage from 20% to 65%.

PROJECTS

Personal Portfolio & Blog - Built with Next.js, MDX, and Tailwind CSS, deployed on Vercel.

Recipe Sharing App - React Native mobile app with Firebase authentication and Firestore backend.
